Interactions

WCAG - 4 main accessibility principles

- Perceivable – *can you see it*
- Operable – *can you use it*
- Understandable – *can you understand it*
- Robust – *it won't break future technologies*

Azure AI services

Bot Service

Accelerated development for conversational AI.

Cognitive Services

Vision, speech, language, decision and search pre-trained services customizable for any scenario.

Azure Machine Learning

Experimentation and management services for creating AI models with productivity.

Regenerate Key1

Regenerate Key2

These keys are used to access your Cognitive Service API. Do not share your keys. Store them securely– for example, using Azure Key Vault. We also recommend regenerating these keys regularly. Only one key is necessary to make an API call. When regenerating the first key, you can use the second key for continued access to the service.

Demo - Connect your Node.js App

1. Create Cognitive Service
2. Create a Node.js web app with Express.
3. Set up authentication.
4. Add sample content.
5. Build and run the app.
6. Launch the Immersive Reader.
7. Host on Azure app services

Conclusion

1. Accessibility
2. Immersive Reader
3. Cognitive Services API
