

# Java on Azure: Building Spring Boot Microservices

**Rory Preddy**  
@rorypreddy

<https://aka.ms/spring-boot-cloud>

---

# Agenda

- 
- Java at Microsoft
  - Microservices?
  - Spring Framework
  - Azure Spring Cloud

Microsoft Azure Partners for Java

Pivotal™

ORACLE®

AZUL  
SYSTEMS®

 **Red Hat**

intel®

SAP®

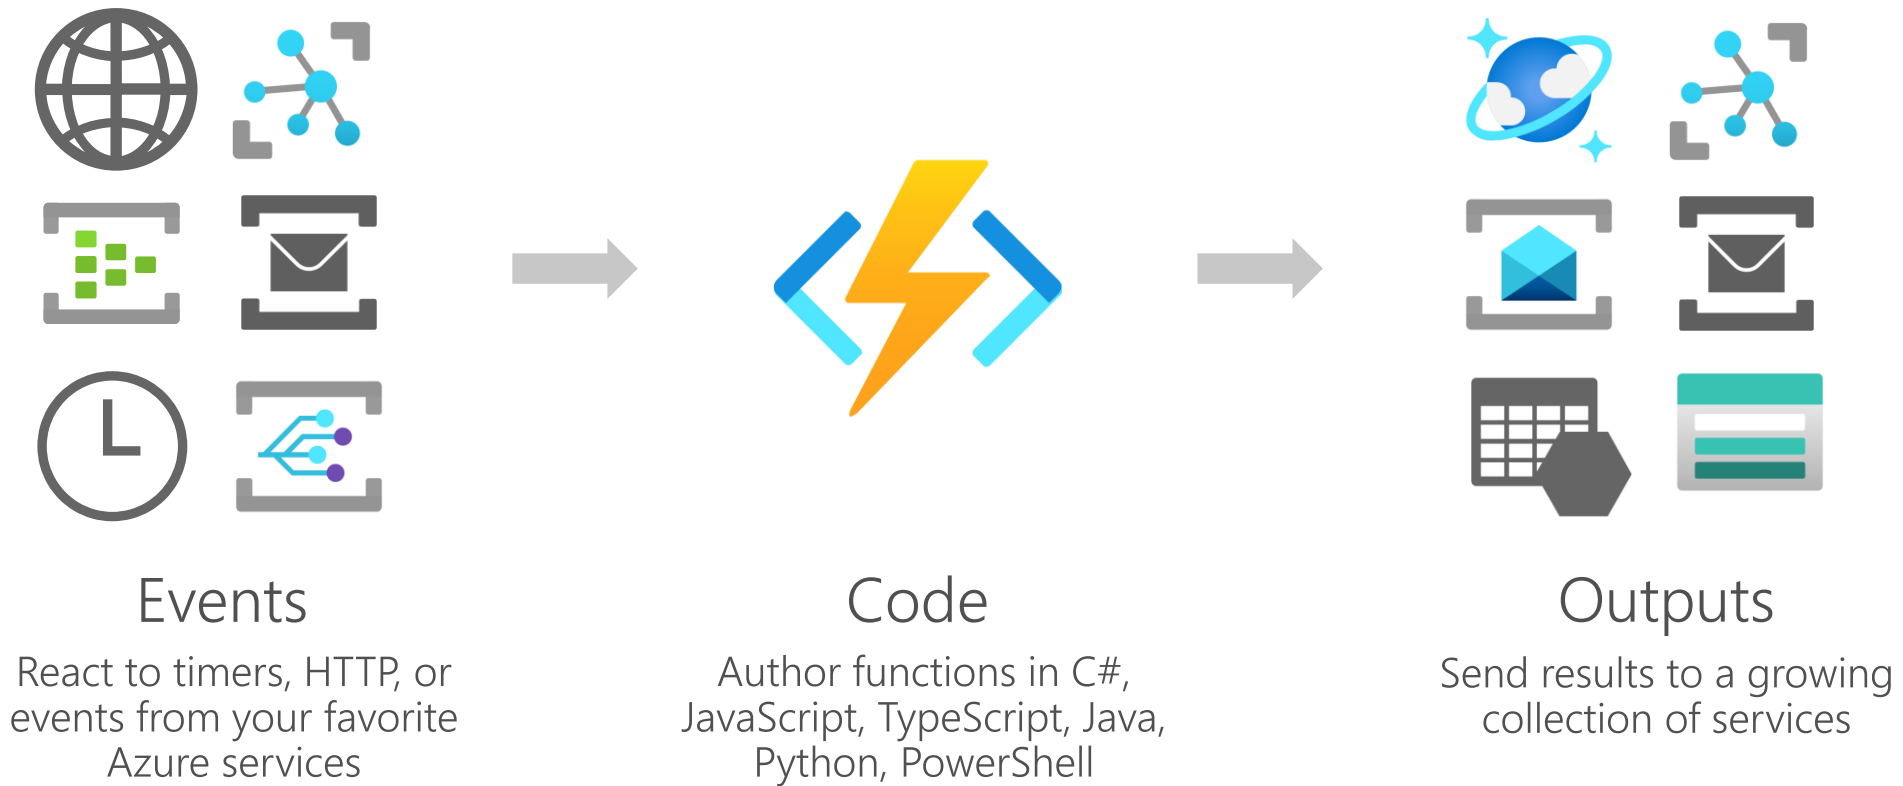

IBM

# Microsoft Uses Java Heavily

- **Azure**
  - Services dependent on Java include Azure Databricks, HDInsight, Spring Cloud, and more.
- **LinkedIn**
  - 100s of Java microservices in production.
  - Over 60+ Java open source projects on GitHub.
- **Minecraft**
  - Hundreds of servers built in Java.
  - Client Java Edition is very popular.
- **Yammer**
  - Java in the back-end.
  - Contributors to Dropwizard Web Framework.
- **SQL Server**
  - Java now embedded out of the box.
  - Polybase data visualization and Big Data Clusters interop with Spark, Hadoop connectors.
- **Android**
  - Thousands of developers building Android applications at Microsoft.
  - New Surface phone based on Android OS.

**Serverless ?= Microservices**

# Azure Functions: Event driven compute

# So what are Microservices?

Monolith

Containerized Monolith

Monolith + new  
microservices

Parts of monolith  
extracted

Microservices or  
serverless  
application

# Sample microservices architecture

# Spring on Azure

 <b>Spring Cloud</b>	 <b>Spring Data</b>	 <b>Spring Security</b>	 <b>Spring Resource</b>
<b>App Configuration</b> <b>Event Hubs</b> <b>Service Bus</b> <b>Storage</b> <b>Redis</b> <b>Functions</b>	<b>SQL Database</b> <b>MySQL</b> <b>PostgreSQL</b> <b>Maria DB</b> <b>Cosmos DB</b> <ul style="list-style-type: none"><li>• SQL</li><li>• MongoDB</li><li>• Cassandra</li><li>• Gremlin</li></ul>	<b>Active Directory (AAD)</b> <b>AAD B2C</b> <b>Microsoft 365</b> <b>Microsoft Account</b>	<b>Storage</b>
 <b>R2DBC</b>		 <b>Spring Cache</b>	 <b>Spring Messaging</b>
<b>SQL Database</b> <b>PostgreSQL</b>		<b>Redis Cache</b>	<b>Service Bus</b>
		 <b>Micrometer</b>	<b>Monitor (includes Log Analytics)</b>

# Spring-based Microservices Development

## Spring Boot

BUILD ANYTHING

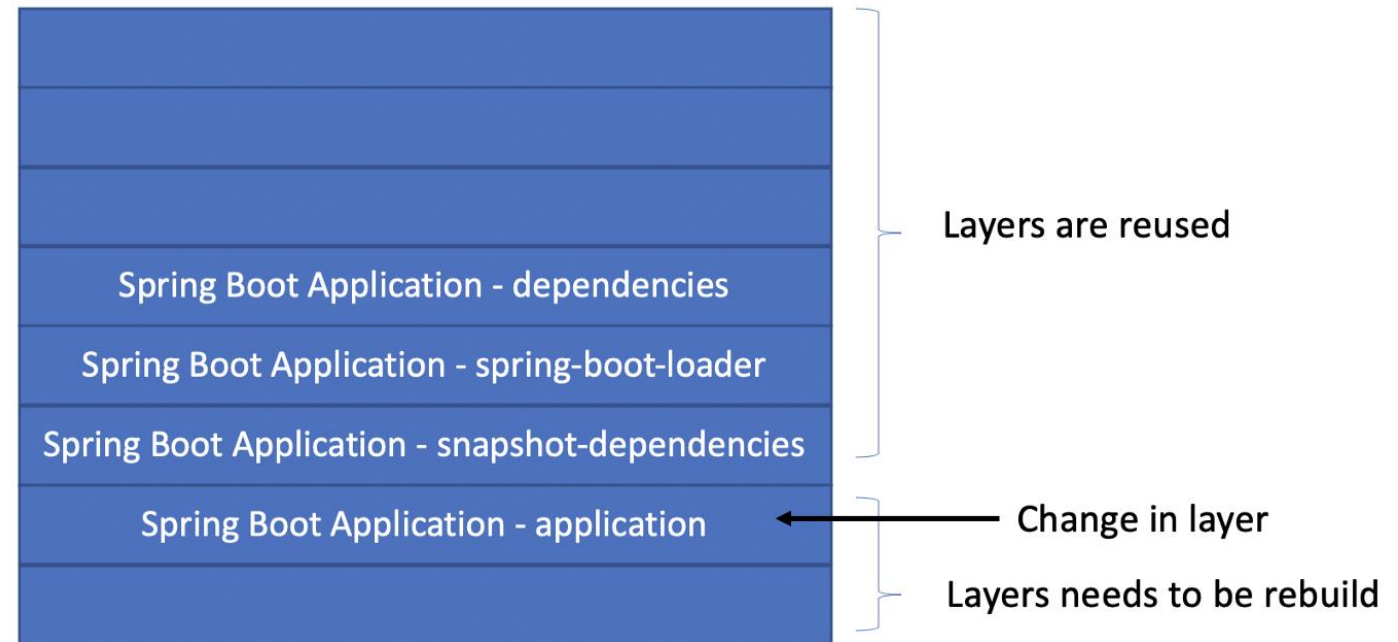

## Spring Cloud

COORDINATE ANYTHING

**Spring Boot** is designed to get you up and running as quickly as possible, with minimal upfront configuration of Spring  
**Spring Cloud** provides a set of tools that makes communication between microservices easier

# Spring boot docker enhancements

- Spring Boot version 2.3 -
- Cloud Native Buildpacks
  - Layered Jars
  - Preview on Azure for Registries
  - Backed by Cloud native foundation + Pivotal

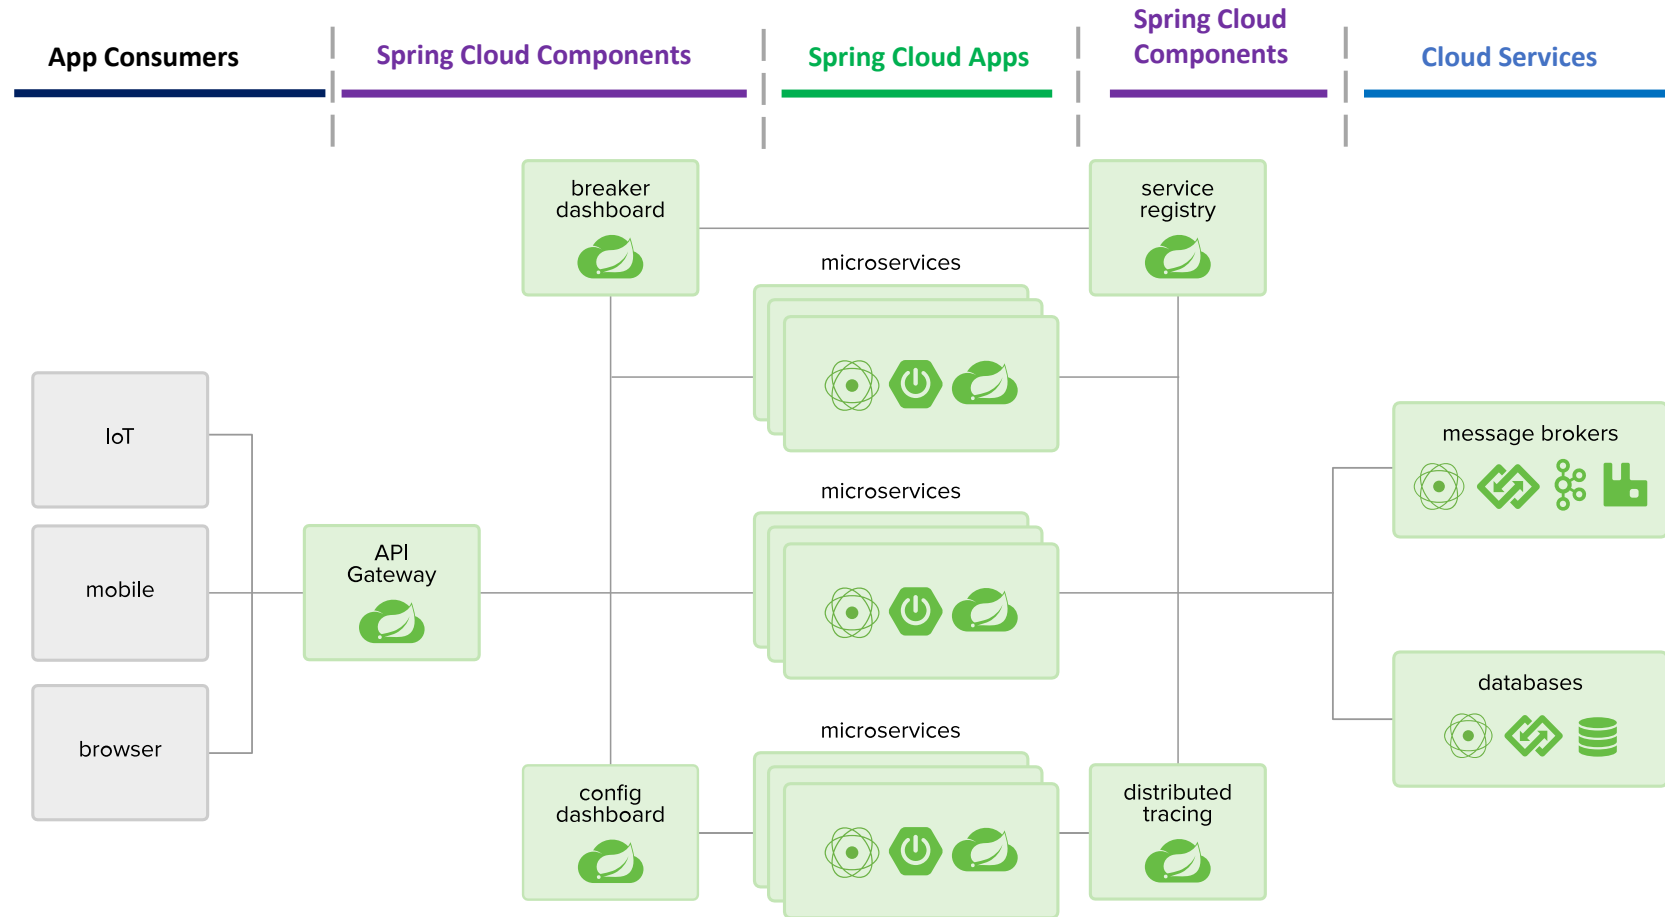

<https://buildpacks.io>

# Common Challenges

**High effort required** to manage cloud infrastructure for Spring boot applications.

Application lifecycle is **difficult to manage**.

**Painful** to troubleshoot application issues

# Azure Spring Cloud

Simple app lifecycle management

Integrated CI/CD pipeline for deployment

Fully managed service

Monitoring and tracing

Scalability and Elasticity

- Demos

- Devops + Spring Boot
- Buildpacks
- Azure Spring Cloud +Redis
